

SUDS Online at Abertay

Building upon the success of ten years of SUDS Online we are pleased to announce an updated and expanded range of online SUDS courses.

These courses provide up to the minute guidance and best practice for SUDS design and operation, and are intended for practitioners, regulators and maintaining organisations.

These courses will be of considerable interest to those who have to be part of and engage with SUDS Approval Bodies (SABs) and other adopting agencies.

Why SUDS Online?

- Get the latest thinking and understanding for SUDS.
- Online access to the course tutor at the University of Abertay Dundee.
- Rapid response to questions and problems.
- Test your knowledge and understanding as you progress by taking the end of unit quizzes.
- Access to a range of case study examples of implemented SUDS systems.

Courses are available to book via the Abertay Online Store: onlinestore.abertay.ac.uk

SUDS Online Courses

SUDS Concepts & Design Principles - 5 October 2015 - £675

29 August 2016 - £675 (Book before 17 June 2016 for the early bird rate of £625)

SUDS CDP (formerly SUDS Online) is a ten week course delivering best practice for the design of SUDS.

The course has been revised to reflect recent changes in legislation, design and ownership responsibility for SUDS in the UK, and includes both national and international examples of SUDS design. SUDS CDP is suitable for professionals involved with the design, approval and adoption of SUDS.

Course Content

Introduction to SUDS | Treatment Train | SUDS Techniques | SUDS Design 1 | SUDS Design 2 | SUDS Performance | SUDS Regulation | Case Study | Current and Emerging Issues | Main Assignment

SUDS Operation & Maintenance - 25 January 2016 - £395 (Book before 20 November 2015 for early bird rate of £345)

SOaM is a six week course providing detailed information and real examples of SUDS operation and maintenance. The course has been developed by an industry expert and is based upon extensive experience of operating and maintaining SUDS throughout the UK.

SOaM introduces the key component parts of SUDS, how they operate, inspection and maintenance requirements, examples of common operational issues, and inspection regimes. This course will be of interest to those involved with SUDS design, approval and aftercare.

Course Content

Introduction to SUDS and Operation and Maintenance | Inlets and Outlets | Access and Safety | General Inspection and Maintenance Activity | Reporting and Operational Examples | Main Assignment

SUDS for Roads - 11 April 2016 - £395

(Book before 8 January for the early bird rate of £345)

SUDS for Roads (S4R) is a six week course providing guidance for SUDS used within the road environment.

There is now, more than ever, a greater focus on street design, with the emphasis on place setting before movement. S4R provides information on the selection, design and detailing of SUDS used for streets and roads, and has been developed in line with the SUDS for Roads (2010) manual, authored by WSP. This course is suitable for local authorities, developers and consultants.

Course Content

Basic Concepts | Design and Detailing | SUDS for Roads Selection Tool and Worked Examples | Trunk Roads and Motorways | Additional Considerations | Main Assignment
